The TXH 600 series models are very compact 600 Watt universal power supplies. Rear side IEC-C13 line socket including mains switch and fuse and the output screw terminal make the connection of these power supplies very easy. Sense line, auxiliary output, remote control, adjustable output voltage, and load share line for up to 3 units in parallel make the units all-purpose applicable.

They come with an active power factor correction. The EMC characteristic is dedicated for applications in industry, IT and domestics. The protection against overvoltage, over-temperature, overload and short circuit and a high efficiency of up to 93% guaranties a reliable operation.

Load sharing:

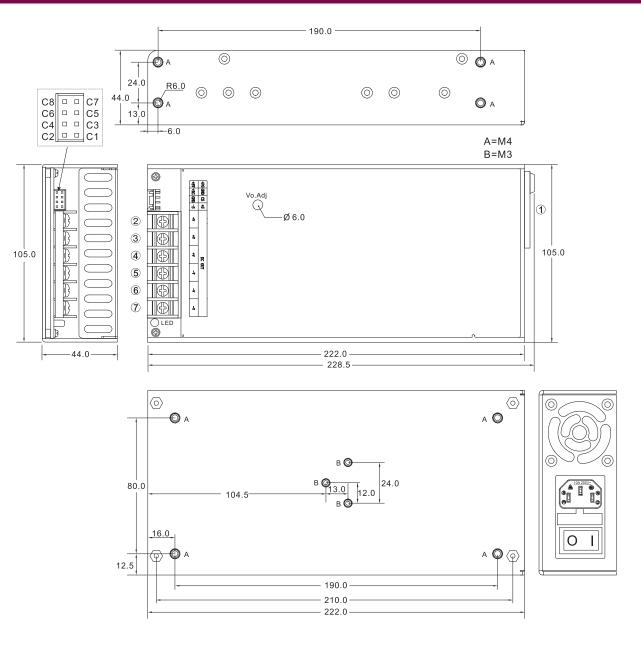

- Difference in Vout among paralleled units should be less than ±1%
- Output power at load share = rated power per unit x number of unit x 80%
- Shorter wiring to each unit is recommended, as well as twisting +S and -S in pairs, as shown.
